

201-22 Graduating Senior Survey Report

Prepared by Institutional Research and Decision Support

Last Updated: May 27, 2022

Response Rate: Of the 1,882 students invited to complete the survey, 848 (45%) provided partial or complete responses. Because students could skip questions, response rates varied by question.

Administration: The survey was available for seniors to complete between March 28 and May 7, 2022. As an incentive, respondents were entering into drawings to receive 35 \$25 Amazon e-gift cards. Students could complete the survey by clicking their individualized link in personalized emails or by using an anonymous link that required authentication. Survey publicity and outreach was coordinated across multiple groups on campus: IRDS, Student Affairs, assessment managers, faculty, academic advisors, and others.

Respondent Characteristics: Please refer to Tables 1-4 below for respondent characteristics, including information about the representativeness of the sample relative to the invited population. The sample was roughly representative of the invitee population, and subgroup response rates were similar to the overall response rate of 45%, with few exceptions. Women were more likely to take the survey than men, which is common in survey research. Other differences in response rates are likely due to small sample sizes for particular groups.

Report Notes: Unless otherwise noted, all students could answer each question on the survey. Students could choose to skip questions. Students were invited to take the survey if they had been awarded a degree or applied to receive a degree as of the 15th day of instruction in spring 2022. It is possible that some students completing the survey did not graduate, though all were seniors and responses still aid understanding of the experience of students close to graduation.
