

2018 Undergraduate Alumni Journey Survey - 1 Year Post-Graduation Respondents
Prepared by Institutional Research and Decision Support
Last Updated: September 10, 2018

Response Rate: Of the 3273 alumni invited to complete the survey, 811 (25%) provided partial or complete responses. Because respondents could skip questions, response rates varied by question.

Administration: The survey was available to undergraduate alumni who graduated from UC Merced during the 2012-13 (5 years post graduation), 2014-15 (3 years post graduation), and 2016-17 (1 year post graduation) academic years. The survey was available between May 29, 2017 and August 12, 2018. As an incentive, respondents were entered into one or more drawings to receive \$1000 total in Amazon e-gift cards (30 \$25 gift cards; 1 \$50 gift card; 2 \$100 gift cards) and all respondents received a promotion code for 15% off their purchase at the Campus Bookstore. Alumni were emailed at up to 2 email addresses on record and efforts were made to ensure that once the survey was completed at one email address that the alum would no longer be emailed at the other. Survey publicity and outreach were coordinated across IRDS and Alumni Relations and consisted of an email campaign and Facebook posts. A survey landing page was also used in publicity materials (alumni.ucmerced.edu/survey).

Respondent Characteristics: Please refer to Tables 1-3 for respondent characteristics, including formation about the representativeness of the respondent sample relative to the invitee population. The sample was representative though there were some differences across majors - though much of this variability may be due to small group sizes, which have large impacts on percentages.

Other Notes:

Number of responses: Unless otherwise noted, respondents could answer each question on the survey; however, only certain respondents could complete some questions based on their prior responses. See the question notes for more information. Additionally, respondents could choose to skip questions. Thus, there will be discrepancies between the overall number of respondents and the number of respondents that answered particular questions.

Free response questions: Open-ended Other and free response question responses are not included in this report for several reasons. They require response coding to analyze, and coding schemes are often developed with a research question in mind. Additionally, in some cases free response data can inadvertently identify particular respondents who completed the survey, thus violating confidentiality. Interested parties should request these data from IRDS or other other units as indicated in the survey notes so that individual requests can be evaluated.

Data summaries: Responses to some of the questions were summarized by IRDS in static tables and figures for this report and thus cannot be filtered in Qualtrics. See the question notes for more information. Interested parties should request these data from IRDS or other other units as indicated in the survey notes.
