Educational progression of UC Merced's inaugural 2005 undergraduate class

UC Merced Institutional Research and Decision Support
May 2016

Overview

On September 5, 2005, UC Merced's inaugural undergraduate class was welcomed to campus. A decade later, UC Merced Institutional Research and Decision Support (IRDS) reviewed the educational progression of those pioneering students. This summary is a first step in an iterative process where IRDS will periodically send a list of alumni to the National Student Clearinghouse for tracking purposes.

A database will be developed and updated for use by campus constituents in order to track enrollment of UC Merced alumni in graduate level programs.

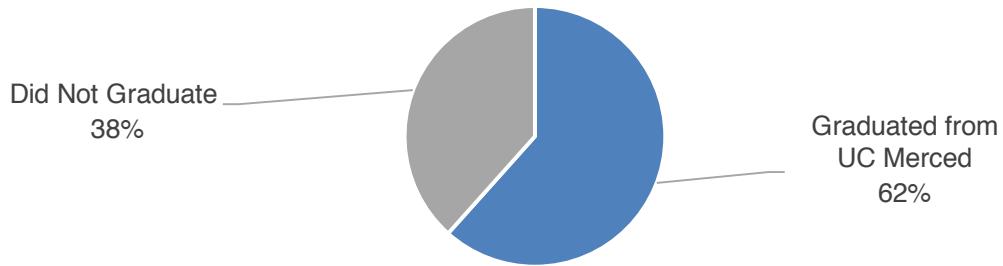

September 2005: The First Scholars Lane Bridge Crossing

How many graduated from UC Merced?

62% of the Fall 2005 cohort received an undergraduate degree from UC Merced

There were 706 students in the Fall 2005 new frosh cohort. To date, 435 (62%) have received an undergraduate degree from UC Merced.

as of September 2015, by percentage**

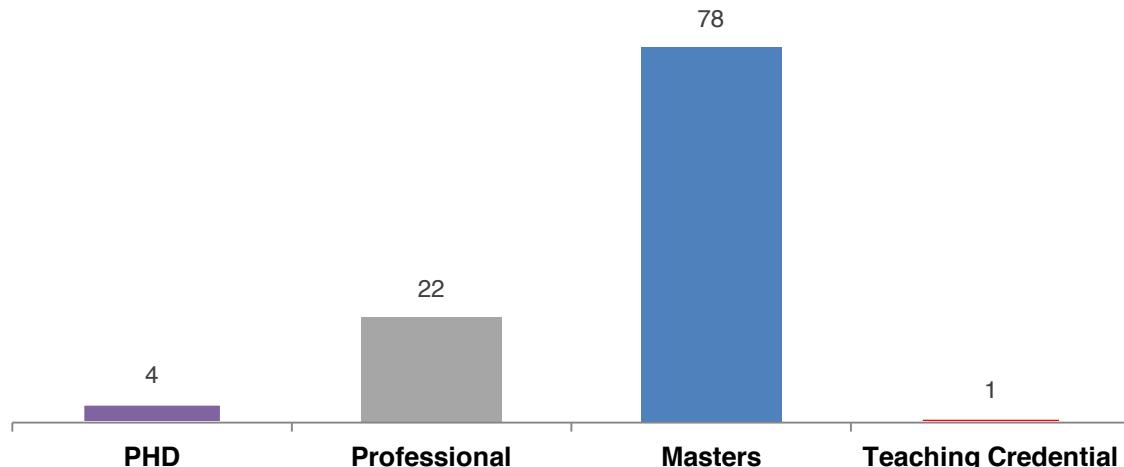

How many have received graduate school degrees?

22.7% of the Fall 2005 frosh cohort have earned graduate degrees

Using data from the National Student Clearinghouse, IRDS was able to identify 105 (22.7%) Fall 2005 frosh cohort alumni who have subsequently earned advanced degrees as of Summer 2015. The majority of students who continued their education earned Master's degrees (74%). Pages 4 and 5 contains more detailed information on student graduate programs and the institutions who awarded the degrees.

by type of degree, as of September 2015**

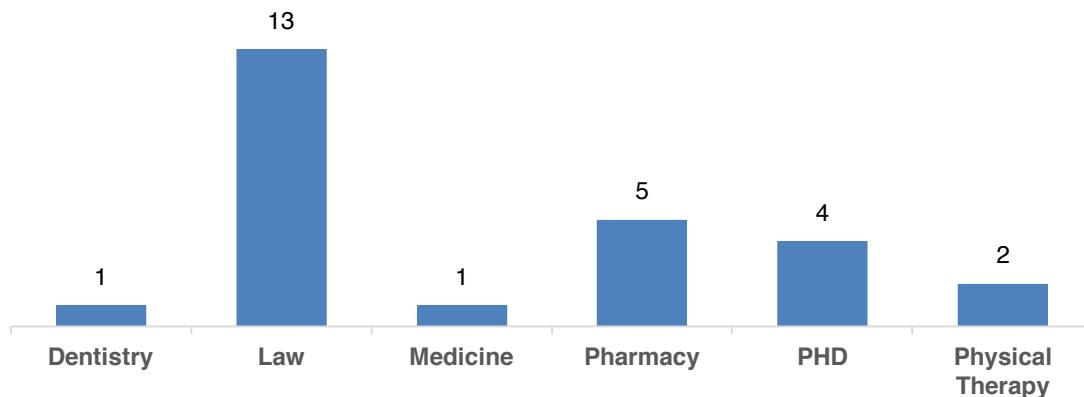

Distribution of Awarded Doctorates and Professional Degrees

Most professional degrees were in Law

Most of the earned doctorates were professional degrees with the majority being in law.

There are still students enrolled in academic doctorate programs so the number of awarded Ph.D's will probably rise slightly over the next few years. Of the 4 students who have earned a Ph.D, two graduated from UC Merced. The other Ph.D students graduated from UC Riverside and State University of New York, Buffalo.

Fall 2005 Frosh Cohort members with Doctorate Degrees, by type of degree, as of September 2015

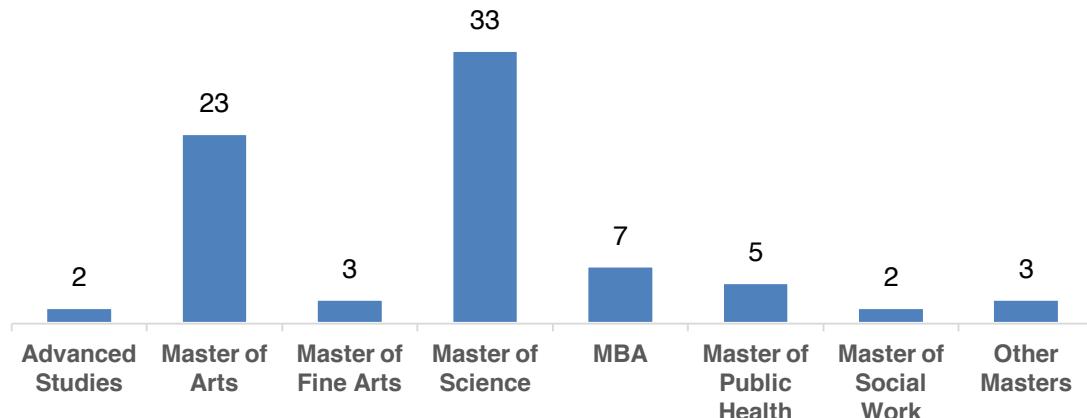

Distribution of Awarded Masters Degrees

Most masters degrees were Masters of Science

Most of the master's degrees are from academic fields, with the majority being a Masters of Science degree.
